

# CT 30

[NEW]

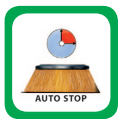

## Great Productivity

Scrubs in difficult to reach areas

Solution control (Solenoid valve)

Brush control with soft start

## High Performance

CFS (Center Flow System)

High quality and performance vacuum motor

Easy to transport

Extractable recovery tank

## Ergonomics, User Friendly

Great maneuverability thanks to an optimum weight distribution

Battery level indicator

### Removable recovery tank

The recovery tank can be removed simply without tools to help the operations of dirty water drain and have an easy access to internal compartments.

# CT 30

## Low Maintenance Cost

Brush replacement without tools

Squeegee blades can be used on 4 sides before replacement

Easy access to internal compartments

## Robust Construction

Tanks and surrounding body in high density polyethylene

Oil bath reduction gear box

Brush head designed to absorb harsh impact (optional)

Squeegee system designed to absorb harsh impact

Panel control switches protected against water and humidity

### Easy to use control panel

The control panel, easy to use and intuitive, allows to activate the brush, the vacuum motor and water supply.

### Height-adjustable handlebar

It is possible to adjust the handlebar height during work to ease the cleaning operations in difficult to reach areas.
